

HOW IT WORKS

CoopCop is a collaborative video security platform based on strategically placed high definition surveillance cameras that provide video coverage of areas of interest throughout the shared property. Homeowners, residents and property management are provided secure access to select cameras to view live and recorded video from their smart television, mobile or PC devices. It's that simple!!!

CoopCop's community policing model results in enhance safety and security for cooperative residents while providing effective protection of your most valuable assets.

- **View Live and Recorded Video from Mobile Device or PC.**
- **Low Up Front Investment**
